SUMMARY

Career-changing front-end web developer with 8+ years of experience in tech sales, leadership, and customer-focused solutions. Recently completed an intensive React-based development program and built production-quality applications using modern technologies. Known for rapid learning, creative problem-solving, and delivering real-world solutions like a tip calculator actively used in a business environment.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React (Hooks, Context API, Router), HTML5, CSS3, Tailwind CSS, Next.js (Learning)
Backend (Learning): Node.js, Express.js, PostgreSQL, Database Design
Tools: Git, GitHub, VS Code, RESTful APIs, EmailJS, Three.js, Netlify

---

PORTFOLIO PROJECTS

Robo's Wishlist – E-commerce React App
[Live Demo](#) | [GitHub Repo](#)
Built with React, Tailwind CSS, and Context API. Features dynamic filtering, persistent cart, search functionality, and checkout process. EmailJS contact integration for mock purchases.
→ Demonstrates responsive design, routing, and component-based architecture.

Tip Calculator – Business Utility App
[Live Demo](#) | [GitHub Repo](#)
React-based app that simplifies tip-out calculations, reducing time spent from over an hour to 15 minutes. Used daily by management in a retail environment.
→ Showcases form validation, React state management, and real-world business application.

Weather Music App – Weather-Based Song Recommendations
[Live Demo](#) | [GitHub Repo](#)
Built with JavaScript, Spotify API, and OpenWeather API. Uses geolocation and weather data to recommend music playlists.
→ Highlights API integration, asynchronous data handling, and user interactivity.
